

- The Australian manufacturer of Forged Wrought Railway Wheels
- Advanced inhouse Steelmaking capabilities
- Market leader in Heavy Haul wheel technology
- Specialise in complex wheel designs for Freight, Passenger and Locomotive applications
- Tailored supply solutions through flexible manufacturing

Comsteel produces forged and rolled railway wheels to International Standards for all classes of rolling stock. In particular the company is at the forefront in developing products for higher axle loading and specific passenger and locomotive applications. New materials and designs for applications such as high hardness and wear resistant wheels

have been developed by Comsteel. These wheels deliver improved performance in all applications.

Forged and rolled wheels of widely varying shapes can be produced in sizes ranging from 650mm to 1250mm in diameter. A modern C.A.D / C.A.M Q-Form system links design flexibility

to manufacturing at the shop floor by generating tooling for Forging and Rolling and machining programs for the CNC Wheel machining centres. Sophisticated inspection techniques and accredited quality assurance systems ensure optimum product quality for our customers.

**Forged
Wheels of
any shape
from 650mm
to 1250mm
diameter**

THE COMPLETE SUPPLY SOLUTIONS

Comsteel has the ability to supply direct to you anywhere in the world.

Ability to supply as individual Wheel or supplied as complete Wheelset.

**AAR Approved
Manufacturer**
